## **Basic Psychoanalytic Concepts on Metapsychology, Conflicts, Anxiety and Other Subjects (Hampstead Clinic Psychoanalytic Library)**

Each volume in the Hampstead Clinic Psychoanalytic Library takes a single theme or group of concepts in Freud's thought and traces its development. Wherever possible Freud's own words have been used and references are always given to his own works, thus enabling the reader to pursue any subject in a minimum of time. The preparation of these volumes entailed six years' active collaboration between fifteen analysts and therapists from the Hampstead Child Therapy Clinic under the chairmanship of Dr. Humberto Nagera. They have subsequently proved to be of enormous use to students, teachers and researchers in the fields of psychoanalysis, psychiatry, psychology, child development and social work.

In this volume the reader can follow the development of Freud's theories regarding important subjects such as Fixation, Regression, Cathexis, Conflicts, Anxiety, Ambivalence, Reality Testing, Transference and Counter-Transference. Some of these subjects have been chosen because of the many misconceptions and misunderstandings which surround them.
