Chemical Engineering in Practice

John Edwards

Chemical Engineering in Practice John Edwards

This book is based on 50 years experience gained whilst working in the process engineering and simulation fields. It covers basic thermodynamics, process control and instrumentation, piping design, emergency relief systems, shell and tube heat exchangers, absorption, distillation, batch distillation and batch reactors. Chapters are dedicated to plant utilities, refinery operations and carbon capture technology. Simulation cases are presented using the CHEMCAD steady state and Dynamic simulator. Trial license available on request.
