Competitive Markov Decision Processes Jerzy Filar, Koos Vrieze

This book is intended as a text covering the central concepts and techniques of Competitive Markov Decision Processes. It is an attempt to present a rigorous treatment that combines two significant research topics: Stochastic Games and Markov Decision Processes, which have been studied extensively, and at times quite independently, by mathematicians, operations researchers, engineers, and economists. Since Markov decision processes can be viewed as a special noncompetitive case of stochastic games, we introduce the new terminology Competitive Markov Decision Processes that emphasizes the importance of the link between these two topics and of the properties of the underlying Markov processes. The book is designed to be used either in a classroom or for self-study by a mathematically mature reader. In the Introduction (Chapter 1) we outline a number of advanced undergraduate and graduate courses for which this book could usefully serve as a text. A characteristic feature of competitive Markov decision processes - and one that inspired our long-standing interest - is that they can serve as an "orchestra" containing the "instruments" of much of modern applied (and at times even pure) mathematics. They constitute a topic where the instruments of linear algebra, applied probability, mathematical programming, analysis, and even algebraic geometry can be "played" sometimes solo and sometimes in harmony to produce either beautifully simple or equally beautiful, but baroque, melodies, that is, theorems.

From reader reviews:

Bessie Morris:

What do you ponder on book? It is just for students since they are still students or it for all people in the world, what the best subject for that? Just simply you can be answered for that query above. Every person has diverse personality and hobby for every single other. Don't to be compelled someone or something that they don't wish do that. You must know how great and also important the book Competitive Markov Decision Processes. All type of book are you able to see on many options. You can look for the internet methods or other social media.

Margaret Boyer:

What do you in relation to book? It is not important along with you? Or just adding material when you need something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have time? What did you do? Every individual has many questions above. They have to answer that question simply because just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on jardín de infancia until university need this particular Competitive Markov Decision Processes to read.

Lonnie Hammer:

This Competitive Markov Decision Processes is great guide for you because the content which can be full of information for you who else always deal with world and possess to make decision every minute. This specific book reveal it facts accurately using great arrange word or we can say no rambling sentences inside. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but difficult core information with wonderful delivering sentences. Having Competitive Markov Decision Processes in your hand like obtaining the world in your arm, details in it is not ridiculous one. We can say that no publication that offer you world within ten or fifteen second right but this reserve already do that. So , this really is good reading book. Hi Mr. and Mrs. active do you still doubt that?

Cara Fultz:

Reading a book being new life style in this year; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and also soon. The Competitive Markov Decision Processes provide you with a new experience in reading a book.
