Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology)

Broadband Satellite Communication Systems and the Challenges of Mobility is an essential reference for both academic and professional researchers in the field of telecommunications, computer networking and wireless networks.

Recently the request of multimedia services has been rapidly increasing and satellite networks appear to be attractive for a fast service deployment and for extending the typical service area of terrestrial systems. In comparison with traditional wide area networks, a characteristic of satellite communication systems is their ability in broadcasting and multicasting multimedia information flows anywhere over the satellite coverage. The papers presented in this volume highlight key areas such as Satellite Network Architectures, Services and Applications; Mobile Satellite Systems and Services; and Hybrid Satellite and Terrestrial Networks.

Mobility will inevitably be one of the main characteristics of future networks, terminals and applications and, thus, extending and integrating fixed network protocols and services to mobile systems represents one of the main issues of present networking. The secondary focus of this volume is on challenges of mobility, that is, on technologies, protocols and services for the support of seamless and nomadic user access to new classes of applications in person-to-person, device-to-device and device-to-person environments. The book comprises recent results of research and development in the following areas; Seamless mobility; Mobile ad hoc and sensor networks; Analysis, simulation and measurements of mobile and wireless systems; Integration and inter-working of wired and wireless networks; QoS in mobile and wireless networks; Future trends and issues concerning mobility.

This state -of-the-art volume contains a collection of papers from two of the workshops of the 18th IFIP World Computer Congress, held August 22-27, 2004, in Toulouse, France: the Workshop on Broadband Satellite Communication Systems, and the Workshop on the Challenges of Mobility.

From reader reviews:

Betty Edmond:

Now a day people that Living in the era wherever everything reachable by interact with the internet and the resources inside it can be true or not require people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the answer is reading a book. Looking at a book can help men and women out of this uncertainty Information specially this Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology) book as this book offers you rich details and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it everybody knows.

James Fong:

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new info. When you read a publication you will get new information since book is one of a number of ways to share the information or perhaps their idea. Second, examining a book will make you more imaginative. When you examining a book especially fictional book the author will bring that you imagine the story how the figures do it anything. Third, you may share your knowledge to other individuals. When you read this Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology), you can tells your family, friends along with soon about yours publication. Your knowledge can inspire average, make them reading a e-book.

Cindy Coleman:

People live in this new moment of lifestyle always aim to and must have the spare time or they will get lots of stress from both daily life and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not really a huge robot. Then we consult again, what kind of activity have you got when the spare time coming to anyone of course your answer will certainly unlimited right. Then ever try this one, reading books. It can be your alternative in spending your spare time, the book you have read is actually Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology).

Helen Scott:

Is it a person who having spare time after that spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This Broadband Satellite Communication

Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology) can be the solution, oh how comes? A fresh book you know. You are thus out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these books have than the others?
