From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series) J. M. W. Slack

The past decade has seen a dramatic increase in our understanding of early animal development. The revised edition of this excellent book describes the results of this revolution and explains in detail how the body plan of an embryo emerges from a newly fertilized egg. The book starts with a critical discussion of embryological concepts, and with simple mathematics describes cell states, morphogen gradients, and threshold responses. The experimental evidence of the mechanisms of regional specification in vertebrates, insects, and selected invertebrates, namely frogs (*Xenopus*), mice, chicks, fruitflies (*Drosophila*), mollusks, ringed worms, sea squirts, and nematode worms (*Caenorhabditis*), is then discussed. The progress with *Drosophila* has been particularly impressive, and there is an entire chapter devoted to it that provides a clear guide to the subject and includes a new table of developmentally important genes. Throughout, the emphasis is on conceptual clarity and unity, and the book brings together mathematical models, embryological experiments, and molecular biology in a single comprehensible and coherent account.

From reader reviews:

Julie Ross:

Book is to be different per grade. Book for children until eventually adult are different content. As we know that book is very important for people. The book From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series) ended up being making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The guide From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series) is not only giving you much more new information but also for being your friend when you really feel bored. You can spend your own spend time to read your guide. Try to make relationship with all the book From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series). You never really feel lose out for everything when you read some books.

Bonnie Abramowitz:

The publication untitled From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series) is the reserve that recommended to you you just read. You can see the quality of the guide content that will be shown to an individual. The language that writer use to explained their way of doing something is easily to understand. The author was did a lot of research when write the book, so the information that they share to you is absolutely accurate. You also could possibly get the e-book of From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series) from the publisher to make you more enjoy free time.

Brandon Erickson:

People live in this new moment of lifestyle always try and and must have the free time or they will get wide range of stress from both day to day life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity are there when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading ebooks. It can be your alternative in spending your spare time, the book you have read is From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series).

Philip Mejia:

Guide is one of source of information. We can add our information from it. Not only for students but additionally native or citizen need book to know the up-date information of year to be able to year. As we know those guides have many advantages. Beside all of us add our knowledge, may also bring us to around the world. Through the book From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series) we can get more advantage. Don't you to be creative people? To be creative person must choose to read a book. Just choose the best book that acceptable with your aim. Don't

possibly be doubt to change your life at this book From Egg to Embryo: Regional Specification in Early Development (Developmental and Cell Biology Series). You can more attractive than now.
