Nanomaterials for Wastewater Remediation

Ravi Kumar Gautam, Mahesh Chandra Chattopadhyaya

Nanomaterials for Wastewater Remediation Ravi Kumar Gautam, Mahesh Chandra Chattopadhyaya

Nanomaterials for Wastewater Remediation introduces techniques for nanoparticle formation and their benefits in environmental cleanup, as well as their recent advances and applications in wastewater treatment. The book follows a sequential approach for the treatment of wastewater, presenting state-of-the-art techniques for the characterization and measurement of nanomaterials.

Nanoparticles represent a promising new technology for wastewater remediation, not only because of their high treatment efficiency, but also for their cost effectiveness, as they have the flexibility for in situ and ex situ applications. New methods for developing nanomaterials with less environmental risk are described. Nanomaterials such as magnetic nanoparticles and graphene-based nanocomposites are discussed in detail. Also includes in-depth analyses of the ecotoxicological impacts of nanomaterials and the latest findings on the transport and fate of nanomaterials in the environment.

- Covers methods for the characterization of nanomaterials using advanced instrumental techniques
- Includes innovative methods for developing new nanomaterials while lessening their environmental risk
- Provides the latest methods for determining the transport and fate of nanomaterials in the environment
- Discusses in detail nanomaterials such as magnetic nanoparticles and graphene-based nanocomposites

From reader reviews:

Carol Witt:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite reserve and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Nanomaterials for Wastewater Remediation. Try to stumble through book Nanomaterials for Wastewater Remediation as your friend. It means that it can to be your friend when you feel alone and beside those of course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know anything by the book. So , let's make new experience and knowledge with this book.

Chad Foster:

As people who live in often the modest era should be upgrade about what going on or details even knowledge to make them keep up with the era which is always change and move ahead. Some of you maybe will probably update themselves by studying books. It is a good choice for yourself but the problems coming to an individual is you don't know which you should start with. This Nanomaterials for Wastewater Remediation is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

Holly Walker:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many query for the book? But any people feel that they enjoy for reading. Some people likes reading through, not only science book but additionally novel and Nanomaterials for Wastewater Remediation as well as others sources were given understanding for you. After you know how the truly great a book, you feel need to read more and more. Science guide was created for teacher as well as students especially. Those ebooks are helping them to add their knowledge. In additional case, beside science guide, any other book likes Nanomaterials for Wastewater Remediation to make your spare time a lot more colorful. Many types of book like this one.

Mark Authement:

A lot of reserve has printed but it is unique. You can get it by world wide web on social media. You can choose the most effective book for you, science, comedian, novel, or whatever simply by searching from it. It is named of book Nanomaterials for Wastewater Remediation. You can include your knowledge by it. Without departing the printed book, it might add your knowledge and make anyone happier to read. It is most important that, you must aware about book. It can bring you from one place to other place.
